PROJECTS

SNARE/TANNER — *web application honeypot*

Jan 2018 - current

I am an active contributor to this open source web application honeypot.

Aimed at capturing maliciousness all over the internet.

Credential capturing honeypot — college's innovation lab project

Feb 2018 - current

This project is based on creating a credential capturing honeypot for an authorized intranet of an organization.

Aimed at capturing the credentials of malicious personnel within the organization.

INTERESTS

Cyber security and hacking

I have a lot of interest in developing applications to improve cyber security, pentesting and white hacking.

Algorithms and Competitive coding

I do coding also as a sport by learning new algorithms, practicing problems and taking part in regular contests hosted by top websites like codechef and codeforces.

Video editing and 3d modelling

I have interest in video editing and do moderate level editings in Sony vegas 13 and do basic level 3d modelling in blender.

Machine Learning

I have interest in the concept of machine learning.

Web development

I have interest in both web front and back end development.

Extra curricular:

- Gaming - I have been playing FPS video games since my 6th class and am really passionate about it. I also have a country skill rank of #54 in a game called Battlefield 1.
- Singing - I am a passionate singer and have won music band competitions in my college.
- Sport - I am a volleyball player and have participated in tournaments around the country representing my college.

SKILLS

- **C/C++** *Advanced libraries and algorithmic knowledge*
- **Python 3.5+** *Advanced libraries knowledge and development experience*
- **Sony Vegas 13** *Moderate knowledge*
- **SQL** *Moderate knowledge*
- **HTML/CSS** *Basic knowledge*
- **JavaScript** *Basic knowledge*
- **Blender** *Basic knowledge*
- **Kali Linux and pentesting tools** *Basic knowledge*
